

Dear WWSPT Patients,

We want to update you on what is happening at WWSPT. We are continuing to provide in-clinic visits with modifications for your safety and ours, meeting Governor Wolf's guidelines. In continuing the goal of safety and fighting the spread of COVID, our staff has been fully vaccinated.

When you arrive at our office, we will have you call from your car and wait until a member of our staff arrives to escort you into the clinic. Your temperature will be taken, and you will be assigned to a private treatment room or an area in the clinic to maintain social distancing guidelines.

We ask that you wear a mask that covers from your nose to your chin, as our staff does, to ensure your safety and ours. We are sanitizing all equipment and treatment rooms, per CDC guidelines, after each session and throughout the day. We are limiting the number of people in the clinic to allow for proper social distancing.

During the past year, most of us have become sedentary due to restrictions from the pandemic. As restrictions become lifted and people feel safer going out, we realize our physical capabilities may be impaired. Physical therapy can help address your specific needs, in order for you to return to your pre-pandemic lifestyle.

We look forward to continuing to meet your physical therapy needs. Be well.
